FOR YOUR MARINE SAFETY PRODUCTS

SERVING THE MARINE & OFFSHORE INDUSTRY SINCE 1967

PTR Lifesaving[®] is a brand name of PTR Holland[®], specializing in a range of activities centered around maritime services. With a strong presence in the largest and busiest ports in Europe, USA and Asia, PTR Holland[®] provides high-quality services that cater to both domestic and international clients across various maritime sectors.

PTR Lifesaving[®] continues to innovate and evolve, ensuring that its clients benefit from the latest technological safety advancements and best practices in the maritime industry.

PTR Lifesaving[®] has recently launched a new range of marine safety products that are setting a new standard in the industry. Designed with cutting-edge technology and high-quality materials, these products provide unmatched reliability, durability, and performance, making them the best in the market for ensuring the safety of both crews and vessels.

HIGH-PERFORMANCE LIFE JACKETS, SAFETY HARNESSES, FALL PROTECTION, AND OTHER ESSENTIAL GEAR TO ENSURE THE WELL-BEING OF MARITIME PERSONNEL IN ALL CONDITIONS.

INFLATABLE LIFEJACKET

The Twin Chamber Inflatable Lifejacket is designed to comply with SOLAS 2010 regulations, as per MSC 81(70) and its amendments MSC 200(80) and MSC 207(81). Engineered for both ease of use and comfort, this lifejacket is a universal adult size, accommodating individuals weighing a minimum of 43 kg and with a maximum chest circumference of 1750 mm.

Code: PTR-150TS-2

Key Features:

1. SOLAS-Approved 150N Twin Chamber Design – Ensures optimal buoyancy and safety.
2. Compatible with Most Immersion and Abandonment Suits – Designed for versatile maritime use.
3. Dual Inflation System – Equipped with two 33g CO₂ cylinders for symmetrical inflation.
4. Durable Construction – Heavy-duty 400D outer cover for enhanced longevity.
5. Universal Fit – One-size design suitable for all adults.
6. Multiple Inflation Options – Automatic inflation systems.
7. Enhanced Safety Features – Includes a crotch strap for a secure fit.
8. Optional SOLAS-Approved Lifejacket Light – Improves visibility in emergency situations.
9. Adjustable Waist Straps – Ensures a snug and secure fit.
10. Quick-Release Velcro Closure – Facilitates easy donning and removal.

This lifejacket offers superior safety, durability, and comfort, making it an essential piece of lifesaving equipment for maritime professionals.

INFLATABLE LIFEJACKET

The Twin Chamber Inflatable Lifejacket is designed to comply with SOLAS 2010 regulations, as specified in MSC 81(70) and its amendments MSC 200(80) and MSC 207(81). It is engineered for both comfort and ease of use, ensuring quick donning in emergency situations. This lifejacket is a universal adult size, suitable for individuals with a minimum weight of 43 kg and a maximum chest circumference of 1750 mm.

Code: PTR-275S

Key Features:

1. 275N Twin Chamber SOLAS-Approved Design – Provides enhanced buoyancy and safety.
2. Compatible with Most Immersion and Abandonment Suits – Ensures versatility across different maritime applications.
3. Dual Inflation System – Equipped with 2 x 60g CO₂ cylinders for symmetrical inflation.
4. Heavy-Duty 400D Outer Cover – Enhances durability and resistance to harsh marine conditions.
5. Universal Fit – Designed as a one-size-fits-all adult lifejacket.
6. Multiple Inflation Mechanisms – Automatic inflation systems.
7. Enhanced Safety Features – Includes a crotch strap for a more secure and stable fit.
8. Optional SOLAS-Approved Lifejacket Light – Improves visibility in low-light or emergency situations.
9. Adjustable Waist Straps – Ensures a snug and secure fit for different body sizes.
10. Quick-Release Velcro Closure – Allows for easy and rapid donning or removal.

This high-performance lifejacket is designed for extreme marine environments, providing optimal safety, durability, and reliability for professionals and passengers alike.

A/M 24 AUTOMATIC/ MANUAL INFLATABLE VEST

Part Number:

Item Number	Size	USCG Approval
IJK132002200	ADULT UNIVERSAL	160.076/4025/0

Approval: 160.076/4025/0

Buoyancy: 22.5 lbs. of minimum buoyancy
100 newtons

Product details:

- Convertible from AUTO/MANUAL inflation to MANUAL ONLY inflation
- Low profile design
- Extended sizing: 30" - 65" chest
- High-Vis inflation chamber with reflective
- Secure pull inflation handle clips to life jacket & allows quick release when pulled for inflation
- Custom screen printing available with departments or agencies name
- Hook and loop closure
- Use Replacement Bobbin Code: IJK139800300
- Use A/M 24 Rearming Kit Code: IJK135200701
- Use Universal Thigh Strap Code: IJK139900700

Approx. Unit Dimensions: 22" x 13" x 3"

Approx. Weight: 1 LB

COMPACT FOAM FOLDING LIFEJACKET

- **Minimum Buoyancy: 275N/ 150N**
- **Compact Design:** Fold-able structure for efficient storage, occupying less space than standard models.
- **Superior In- Water Performance:** Ensures stability and safety in various conditions.

Features:

- **Integrated Safety Features:** Equipped with a whistle, buddy line, and lifting loop for enhanced rescue efficiency.
- **Easy Donning:** Designed for quick and effortless wear.
- **Minimal Buoyancy Loss:** Retains over 95% of buoyancy even after 24 hours.
- **SOLAS Compliance:** Alternative option available with SOLAS- Approved emergency light.

- **High-Performance Child Life Jacket**
- **Minimum Buoyancy: 75N**
- **Design:** Yoke-style vest for optimal fit and comfort
- **In-Water Performance:** Excellent stability and support

Features:

- Includes whistle, buddy line, and high-visibility lifting loop for quick rescue
- **Easy Donning:** Fast and simple to put on in emergency situations
- **Visibility:** Constructed with high-visibility fabric, foam, and webbing—field-proven for effectiveness
- **Durability:** Buoyancy loss is less than 5% after 24 hours
- **Lighting:** Compatible with SOLAS-approved emergency light

- **Minimum Buoyancy: 65N**
- **Design:** Yoke-style vest for enhanced fit and comfort
- **Performance:** Excellent in-water stability and support

Features:

- Equipped with a whistle, buddy line, and a high-contrast lifting loop for easy identification and rescue
- Designed for quick and effortless donning
- High-visibility fabric, foam and webbing, ensuring optimal recognition and durability in real-world conditions
- **Buoyancy Retention:** Less than 5% buoyancy loss after 24 hours
- **Compliance:** SOLAS-approved emergency light alternative available

ADULT COLLAR STYLE LIFE JACKET

Part Number:

Item Number	Size	USCG Approval
T1VK100100200004	UNIVERSAL	160.055/150/0

Approval:

USCG Approved Type I

Buoyancy:

22 lbs
98 Newtons

Product details:

- Color: International Safety Orange
- Foam: PE (Polyethylene)
- Designed for extended survival in rough waters where rescue may be slow in coming
- Required on commercial crafts
- This type designed is to position an unconscious person vertically or slightly reclined
- Reflective panels for high visibility
- Attachment loop for safety light
- This life jacket is designed for adults weighing 75 lbs or more

Approx. Unit Dimensions:

Unit Dimensions	Unit Weight
23.5" x 13" x 3.3"	1.8 lbs
59.7 cm x 33 cm x 8.4 cm	0.82 kg

CHILD COLLAR STYLE LIFE JACKET

Part Number:

Item Number	Size	USCG Approval
T1VK100100200002	CHILD	160.055/150/0

Approval:

USCG Approved Type I

Buoyancy:

11 lbs
49 Newtons

Product details:

- Color: International Safety Orange
- Foam: PE (Polyethylene)
- Designed for extended survival in rough waters where rescue may be slow in coming
- Required on commercial crafts
- This type can turn an unconscious person to a vertical or slightly backward inclined position
- Reflective panels for high visibility
- Attachment loop for safety light
- Fits children less than 90 lbs

Approx. Unit Dimensions:

Unit Dimensions	Unit Weight
18.0" x 10.0" x 3.0" 45.7 x 25.4 x 7.6 cm	1.1 lbs 0.5 kg

TYPE I ADULT UNIVERSAL VEST STYLE LIFE JACKET

Part Number:

Item Number	Size	USCG Approval
T1VK100400200004	UNIVERSAL	160.055/222/0

Approval:

USCG Approved Type I

Buoyancy:

22 lbs
98 Newtons

Product details:

- Designed for extended survival in rough waters where rescue may be slow in coming
- Turns most unconscious wearers face up in water
- Bright orange fabric
- SOLAS grade reflective material for increased visibility
- Attachment loop for safety light
- USCG Approved/SOLAS compliant whistle attached
- Adjustable straps for a snug fit
- Minimum 22 lbs. of buoyancy

LJK150400200080	3X-LARGE	160.064/3575/0

Approval: USCG Type III

Buoyancy: 15.5 lbs of minimum buoyancy
70 newtons

Product details:

- Soft and comfortable flotation foam
- Durable nylon construction
- Flotation foam filled collar for added support and comfort
- Three 1.5” buckles, two 1.5” encircling belts, chest strap, and heavy-duty zipper closure
- Multiple cargo pockets
- Two D-rings for small accessories and engine cut offs
- 62 sq. inches of SOLAS grade reflective material
- Contrasting stitching on belts and straps for more efficient vessel checks
- USCG approved/SOLAS compliant whistle attached

SWIFT WATER RESCUE VEST “SWRV”

Part Number:

Item Number	Size
PSK151300410004	One Size

Product details:

- Hi-Vis yellow fabric
- Zippered front panel covers buckles to reduce snag hazards
- Grab handle to assist rescue team members retrieve the wearer
- Three encircling belts with heavy-duty buckles
- Durable 500 denier Cordura® and 400 denier hi-vis nylon
- Lightweight and durable flotation foam
- Quick-release rescue harness
- SOLAS Grade reflective material
- Large zippered pocket, front lash tabs, covered strap attachments and multiple lashing areas for lights, whistle, knife, necessary gear
- Clear panel on vest back for name badge
- Leg straps with metal D-rings and snap hook
- Minimum 22 lbs. of buoyancy
- U.S. Coast Guard approved Type V

SWIFT WATER RESCUE VEST “SWRV” TETHER

Part Number:

Item Number

Size

PSK152000700-999

One Size

Product details:

- Heavy-duty carabiner and stainless steel D-ring for right or left shoulder placement

SWIFT WATER TETHER SYSTEM INSTALLATION INSTRUCTIONS

1. Install the larger wrap on the back of the Kent Swift Water Rescue vest. Place it at the lower half of the vertical strap, above the rescue belt.

2. With the non-coated side facing out, wrap around the strap. Connect the hook and loop. Push the longer tab under, and through to the other side.

3. Fold the tether in half (A), then in half again (B). Make sure there are no twists in the strap.

4. Place the folded tether in-line with the vertical strap. Bring the hook end around the tether and connect to the loop on back. Connect the carabiner to the D-ring on the rescue belt.

5. Attach the smaller wrap around the tether and vertical strap. Connect the hook and loop behind the vertical strap. The tether will be able to slide out of the wraps when pulled on the D-ring.

SOLAS PVC WORK VEST

Item Code: PTR-PVC-WV

Engineered for safety, built for performance, the PTR-PVC-WV sets a new standard in personal flotation.

High Buoyancy

With a buoyancy rating of $\geq 150\text{N}$, the PTR-PVC-WV delivers exceptional flotation support that meets or exceeds international marine safety standards.

Whether at sea or in inland waters, it provides the confidence you need when it matters most.

Featherlight Design

Weighing no more than 0.5 kg, this ultra-light device ensures freedom of movement without sacrificing safety. Ideal for long hours of wear, it reduces fatigue while maximizing mobility.

Durable NBR Foam Core

Constructed with premium NBR foam, the PTR-PVC-WV offers outstanding buoyancy, impact resistance, and long-term durability-even in extreme marine conditions.

Consists of three independent parts, single size: 32*23*4.5cm

TYPE V VINYL DIP WORK VEST

Part Number:

Item Number	Size	Color	USCG Approval
WVK151200200004	Universal	Orange	Approved
WVK151200200005	Adult OVS	Orange	Approved

Approval: U.S. Coast Guard approved Type V Work Vest

Buoyancy: 17.5 lbs. of minimum buoyancy

Product details:

- Durable, highly visible USCG approved Type V Work Vest
- Opening in back to accommodate most fall harnesses
- Adjustable shoulders and Heavy-duty fully encircling belt and chest strap
- Reflective panels on front and back for greater visibility
- Contrasting stitching on belts and straps for more efficient vessel checks
- Compatible with Radio Pocket Code: WVK151900200
- Fits chest size 30"-52"- ADULT UNIVERSAL
- Fits chest size 42"- 68" - ADULT OVERSIZE
- U.S. Coast Guard approved Type V Work Vest

LIFEBUOY EQUIPMENT

LIFEBUOY RING with SOLAS REFLECTIVE TAPE

Product Model: PTR-5555-I (2.5 kg)

Product Model: PTR-5555-II (4.3 kg)

Weight: 2.5 kg / 4.3 kg

Color: High-visibility Orange

Shell Material: High-Density Polyethylene (HDPE) Filler

Material: Rigid Polyurethane Foam

Outer Diameter: 720 mm $\pm$ 20 mm

Inner Diameter: 440 mm $\pm$ 20 mm

Compliance: SOLAS

LIFEBUOY FLOATING LIFELINE ENCAPSULATED

Product Model: PTR-LFL-8X30M (30 meters)

Product Model: PTR-LFL-8X50M (50 meters)

Rope Diameter: 8 mm

Available Lengths: 30 meters and 50 meters

Material: High-quality, floatable Polypropylene

Attachment: Securely fixed to lifebuoy for rapid deployment in water rescue operations

Features:

- Lightweight and durable
- Excellent resistance to water, UV rays and chemicals
- Ideal for use in marine safety and emergency rescue situations

LIFEBUOY FLOATING LIFELINE

Product Model: PTR-LFL-8X30M

Rope Size: 8 mm diameter $\times$ 30 meters length

Rope Material: Durable, lightweight Polypropylene

Compliance: SOLAS

Features:

- High-strength float-able rope
- Designed for quick deployment during water rescues
- Resistant to water absorption and UV degradation

LIFEBUOY EQUIPMENT

Product Model: PTR-BUOY-BOX

Material: Glass Reinforced Plastic (GRP)

Diameter: 92 cm

Height: 19 cm

Weight: 16 kg

Features:

- Durable and weather-resistant construction
- Ideal for outdoor and marine environments
- Designed to securely house standard lifebuoys and keep them protected from environmental exposure

LIFEBUOY RING QUICK RELEASE BOX

Product Model: PTR-BUOY-BOX-QR

Material: Fiber Reinforced Plastic (FRP)

Set Configuration: One set includes two pieces

Board Structure: Each board comes as a complete unit

Features:

- Lightweight yet highly durable construction
- Resistant to impact, corrosion, and harsh marine environments
- Designed for quick deployment in rescue operations

LIFEBUOY RING BRACKET

Product Model: PTR-BUOY-BRK

Material Options:

- Iron with corrosion-resistant spray paint finish
- Stainless Steel for enhanced durability and rust resistance

Width: 58 cm

Height: 67 cm

Design: Y-type structure, specifically engineered to support lifebuoys weighing 2.5 kg and 4.3 kg

LIFEBUOY EQUIPMENT

LIFEBUOY LIGHTS

ITEM CODE: PTR-QD-2

Product Introduction:

The Lifebuoy Self-Igniting Light is equipped with a reliable tilt switch mechanism. When deployed into the water along with the lifebuoy, the light automatically floats to the surface and activates via the tilt switch. It provides a luminous intensity of at least 2-candela and operates with flashing signals for more than 2 hours, offering a dependable aid for search and rescue operations at sea.

Product Performance Parameters:

- Withstood 10 thermal cycles between -30°C and +65°C without any signs of physical or mechanical damage, such as shrinkage, cracking, swelling, decomposition, or deterioration in performance.
- Operates reliably within an ambient temperature range of -1°C to +65°C.
- Flash Frequency: 50 to 70 times/min

Model	Switch method	Power source	Light source
RSQD-2	Tilt switch	Alkaline battery	Bulb
luminous intensity	Flare time	Dimension	Weight
≥2.0cd	≥2h	115*92*352mm	≤305g(without battery)

Product Technical Standards:

This product complies with the following international maritime safety regulations and standards:

SOLAS 1974 and its amendments, Chapter III, Articles 5, 6, 33, 37, 43, and 45
International Life-Saving Appliance (LSA) Code, Chapters I and II
IMO Resolutions:

- MSC.81(70), as amended by MSC.200(80)
- MSC.226(82), MSC.323(89), and MSC.378(93)
- Part 2, Section 21

Use Operation:

Before use, install the power source (3 × 1.5V alkaline batteries connected in series). Once the batteries are installed, secure the lifebuoy light to the lifebuoy and mount it on the bracket in an inverted position. During use, the light will be thrown into the water along with the lifebuoy.

Upon contact with the water, the light will automatically float to the surface and begin flashing with a white light.

Validity:

The validity of lifebuoy light is based on the date of the alkaline battery lifespan. Discarded expired products shall be handled in accordance with the relevant policies of the local environmental protection department.

LIFEBUOY EQUIPMENT

LIFEBUOY LIGHTS ITEM CODE: PTR-QD-EX

Product Introduction:

Explosion-Proof Lifebuoy Self-Igniting Light

The Explosion-Proof Lifebuoy Self-Igniting Light is mounted on the lifebuoy and is designed to provide visibility of the lifebuoy's position at sea. It uses light signals to help ship personnel and rescue teams easily locate the lifebuoy, particularly during nighttime or low-visibility conditions.

Product Performance Parameters:

Flare time: more than 2 hours

-Illumination: LED

-Luminous Intensity: more than 2.0-candela

-Flash Frequency: 50-70 times/minute

-Validity: 5 years

Luminous intensity	≥2 cd	Frequency of flash	50-70 Flashes/min
Lighting period	≥2h	Battery Type	Lithium battery
Luminous style	Flash	Overall dimension	φ89 x 196mm

Product Technical Standards:

This product complies with the following international maritime safety regulations and standards:

SOLAS 1974 and its amendments, Chapter III, Articles 5, 6, 33, 37, 43, and 45
International Life-Saving Appliance (LSA) Code, Chapters I and II

IMO Resolutions:

-MSC.81(70), as amended by MSC.200(80)

-MSC.226(82), MSC.323(89), and MSC.378(93)

-Part 2, Section 21

Use Operation:

When the lifebuoy is thrown into the water, the lifebuoy light will automatically detach from its fixing clip and be released into the water. Upon release, the switch of the lifebuoy light will be automatically activated, turning the light on and initiating a flashing signal. Note: After the lifebuoy light enters the water, the light's head will automatically orient upwards and it will float on the water's surface.

PHORCYS II IMMERSION SUIT

Product Introduction:

The Phorcys Suit is crafted from a neoprene foam composite material with glued seams, ensuring high durability and waterproofing. Equipped with an inherent buoyancy pillow at the back, this suit is designed to be worn without an additional life-jacket. A watertight zipper provides a secure seal for waterproof and thermal insulation performance. In tests, the wearer's body temperature decreased by no more than 2°C after 6 hours of immersion in water temperatures of 0-2°C.

Product Performance Parameters:

The suit withstands extreme temperatures, with no damage or degradation observed after 10 test cycles alternating between -30°C and 65°C. Test subjects were able to don the immersion suit independently within 2 minutes in calm water at temperatures between 0°C and 2°C, even after extended exposure to -30°C. After 24 hours of immersion, wearers' body temperatures remained within 2°C of their baseline.

Specifications:

Material: CR Neoprene

Thickness: 5 mm

Sizes: S, M, L, XL

Design: Self-supporting buoyancy, suitable for use without a life jacket.

Gloves: Three-finger neoprene gloves for added dexterity and insulation. Each suit complies fully with SOLAS requirements, including all current amendments. Once manufactured, each unit undergoes a rigorous air-tightness test to ensure performance standards are met before packaging and distribution.

Certificates: DNV EC-TYPE APPROVAL (MODULE B)

Small: 1500-1650 mm

Medium: 1650-1800 mm

Large: 1800-1950 mm

Extra Large: 1950-2050 mm

Child Suitable Height: 1300mm -1500mm

Preparation:

- Unpack the suit and unzip it fully.

Putting on the Suit:

- Step into the trouser legs first.
- Pull up the leg zippers to limit water entry.
- Insert both arms into the sleeves.
- Put on the hood.

Securing the Suit:

- Pull up the watertight zipper.

PRODUCT TECHNICAL STANDARD:

POLAR IMMERSION SUIT

The Most Advanced Cold Water Protective Suit On the Market

the insulation of an Eskimo Ensemble. CLO is a measurement of a garment's thermal protection. Most high quality suits on the market have a CLO rating between 2.0 and 2.5, while an Eskimo Ensemble, complete with fur layers, reaches a CLO factor of 4.0. In comparison, the Arctic 10+ boasts an impressive CLO rating of 4.87, offering superior warmth and protection.

The Arctic 10+ Surpasses all regulatory standards, and offers exceptional safety features:

- **Buoyancy** – Keeps you floating high above the water for increased visibility.
- **Fire Protection** – Provides over 30 seconds of fire resistance, compared to the standard 2 seconds.
- **Jump Height** – Withstands jumps from 10 meters, more than double the standard 4.5 meters.

These advanced features mean you can travel farther through flames and safely jump from greater heights, maximizing your chances of survival.

BATWING configuration: Allows users to retract their arms inside the suit and open the front zipper from within. This design allows access to bare hands for essential tasks such as eating, drinking, administering first aid, or attending to bodily functions—all while staying protected.

Built-in SPLASH TENT: Keeps the user fully shielded from wind, rain, and waves, allowing for comfortable rest inside the suit. The tent regulates internal temperature by adjusting the opening, controlling airflow, and even enabling the user to breathe warm air in extreme Arctic conditions.

Certifications:

- Transport Canada (MQ7228)
- U.S. Coast Guard Approved
- Marine Equipment Directive (MED) Certified
- Complies with Polar Code.
- Officially certified as an immersion suit, meeting the highest safety and regulatory standards.

Tested for Arctic Conditions:

- Extreme Cold Endurance
- Frozen in Ice at -30°C (-22°F)
- Withstands 10 km/h Winds

PHORCYS TEST KIT (UNIVERSAL)

Part Number:

Item Number

PHORCYS Test Kit

Suitable for testing all standard immersion suits. This Immersion Suit Test Kit is designed for professional testing of immersion suit air tightness to ensure SOLAS/IMO compliance and personal safety at sea.

Key Features:

- **Reliable Leak Detection:** inflate the immersion suit using the included air pump or an external gas source to test for air tightness. Detect and locate any leakage with precision.
- **Efficient Repair Solution:** Identify the leakage area and use the included repair tools and patch materials to restore the suit's integrity.
- **Field-Ready Tools:** Lightweight, portable, and easy to use—ideal for shipboard and onshore and onshore professionals.

RING BUOY LINE BAG

Part Number:

Approval: USCG & Transport Canada approved. Level 70

Buoyancy: 15.5 lbs of minimum buoyancy
70 newtons

Product details:

- ANSI Compliant - Class II
- Hi-vis yellow fabric
- Orange reflective tape for increased visibility
- Opening in back to accommodate most fall harnesses
- Encircling belts with zipper closure
- Contoured foam for freedom of movement
- Hidden belts to reduce snags
- Dual cargo pockets
- Fleece-lined handwarmer pockets
- Contrasting stitching on belts for more efficient vessel checks
- Foam: PVC front & back

SOLAS TAPE

Item Code: PTR-SOLAS-TAPE

When visibility saves lives, SOLAS (Safety of Life at Sea) reflective tape is the industry's gold standard for marine and emergency applications.

Ultra-High Reflectivity

Designed to reflect light from even the weakest sources, SOLAS tape ensures maximum visibility in low-light, fog, and nighttime conditions. Complies with IMO regulations, making it ideal for life-saving appliances and maritime use.

Marine-Grade Durability

Engineered to withstand harsh marine environments, SOLAS tape resists saltwater, UV exposure, extreme temperatures, and abrasion - providing long-lasting performance whether above or below deck.

Versatile Applications

Perfect for lifeboats, life jackets, lifebuoys, rescue boats, survival suits, and more. Also used on stairways, railings, and emergency exits for enhanced safety visibility.

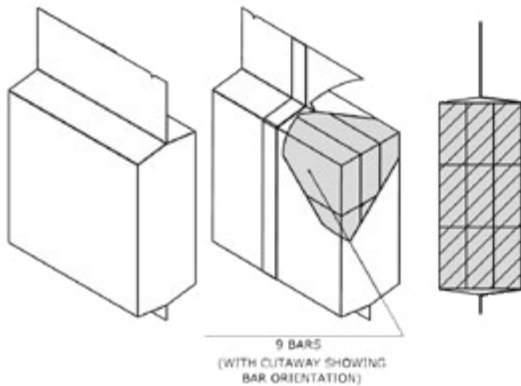

Strong Adhesion

Features a pressure-sensitive adhesive backing that bonds securely to metal, plastic, fabric, and painted surfaces - no peeling, even in wet conditions.

EMERGENCY RATIONS: SURVIVAL NUTRITIONAL PACK

Emergency Rations provide high energy food for emergency survival. Approved world-wide for use on board lifeboats and liferafts, our compact emergency rations have been developed to offer the highest quality rations.

Code: EFWC9750000

Survival ration food box conforms to ISO18813:2022 approved by Lloyds Register and the USCG to meet the requirements for survival food. The pack consists of nine high energy wrapped bars in a vacuum sealed alu-foil pack to maintain freshness. Each food pack weighs 500g (17.64 oz) providing an average 10,150kJ of energy meeting all the worldwide regulations. The packaging has been thoroughly tested to provide product durability and keeps fresh for 5 years.

Ingredients

Wheat flour, vegetable fat (palm), sugar, may contain traces of milk and soy.

Logistics

Box Dimensions	H 105 mm W 112 mm D 47 mm
Carton	17 units
Net Weight	8.5 kg
Gross Weight	13.44 kg (29.63 lb.)
Carton Dimensions	373 x 270 x 155 mm
Volume	0.016 cbm

Features

- Compact size for ease of transport and storage
- Ready to use, consumed directly from the packet
- 5 years shelf life
- Vacuum packed and watertight alu-foil
- Vegan
- GMO and nut free
- Dropped and tumble tested to ensure durability
- Contains optimal ratio of balanced nutrition to volume
- Approvals Complies with: ISO 18813:2022 and SOLAS IMO Resolution MSC.48(66) LSA Code as amended

EMERGENCY DRINKING WATER

SURVIVAL NUTRITION

Emergency Drinking Water provides superior quality drinking water for emergency survival. Approved world-wide for use on board lifeboats and liferafts, our emergency drinking water is globally approved to meet ISO standard 18813:2022 and Directive (EU) 2020/2184.

- + Compact and flexible packaging for ease of transport and storage very compact for stowage
- + Ready to use, consumed directly from the packet
- + Packed in nitrogen rich air and watertight alu-foil

Instructions

- Drink directly from the sachet
- Save drinking water, drink maximum 0.5L every 24 hours

Code: EWWC9450000 (1/2L)

Code: EWWC9450000-1 (125ML)

500ml (16.9 fl.oz) Emergency Drinking Water contains of 4 x 125ml (4.227 fl.oz) alu-foil sachets. Cartons are available as 23 x 500ml (16.9 fl.oz) units with a weight of 11.5 kg (25.35 lb.) net/carton. The high-quality packaging also includes directions for use in multiple languages. The product meets the updated 2022 ISO standard for a five year shelf life and the flexible packets offer minimum weight and are easy to stow. Product can also be consumed in a frozen condition.

HARNESSES & ACCESSORIES

5-Point Full-Body Harness
Code: FPSK15502G

- Dorsal D-Ring
- Adjustable Tongue Buckle Leg Straps
- Pass-Through Buckle on the Chest Strap

5-Point Full-Body Harness
Code: FPSK15503G

- Dorsal and Hip D-Rings
- Adjustable Tongue Buckle Leg Straps
- Pass-Through Buckle on the Chest Strap

Our 5-Point Full Body safety harnesses are an excellent option for those who want reliable protection at an affordable price. These harnesses come equipped with a fall indicator and coated hardware, which helps prevent corrosion and extends the lifespan on the harness.

- Adjustable Shoulder Straps
- Dorsal D-Ring for Fall Arrest

- Adjustable Tongue Buckle Leg Straps
- Meets Applicable ANSI Standards

5-Point Full-Body Harness
Code: FPSK15502SG

- Includes Spring Buckles & Dorsal D-Ring
- Adjustable Tongue Buckle Leg Straps
- Pass-Through Buckle on the Chest Strap

5-Point Full-Body Harness
Code: FPSK15504G

- Dorsal, Hip, and Sternal D-Rings
- Adjustable Tongue Buckle Leg Straps
- For Positioning, Climbing, and Confined Space

HARNESSES & ACCESSORIES

5-Point Padded Full-Body Harness Code: FPSKPNT11G

- Dorsal D-Ring
- Adjustable Tongue Buckle Leg Straps

5-Point Padded Full-Body Harness Code: FPSKPNT12G

- Dorsal and Hip D-Rings
- Adjustable Tongue Buckle Leg Straps

Our 5-Point Padded Full Body safety harnesses prioritize safety and comfort, incorporating cushioned straps for the shoulders, back and legs. Moreover, they come with a fall indicator and durable hardware coated to resist corrosion for enhanced longevity.

- ▶ Adjustable Shoulder Straps
- ▶ Adjustable Tongue Buckle Leg Straps
- ▶ Quick Connect Buckle on Chest Straps
- ▶ Dorsal D-Ring for Fall Arrest
- ▶ Meets Applicable ANSI Standards

Attachable Shoulder/Back Pad Code: FPSKSP001

- Harness Not Included
- Fits All PTR Harnesses and Others with 1.77" webbing
- Mesh Pad Easily Attaches with Connectors

Attachable Padded Positioning Belt Code: FPSKW2101G

- Hip D-Rings
- Adjustable Grommeted Tongue Buckle
- Equipped with Mesh and Foam Padding
- To be Used with Safety Harness

HARNESSES & ACCESSORIES

5-Point Adjustable Arc Flash Harness
Code: FPSK15507D

- Dorsal and Hip D-Rings
- Adjustable Tongue Buckle Leg Straps
- Pass-Through Buckles on Leg and Chest Straps

Suspension Relief Pack
Code: FPSKSTS01

Allows the user to stand in a harness to relieve suspension trauma after a fall.

Our Arc safety harnesses feature flame-resistant webbing and dielectric hardware, capable of withstanding up to 13,500 volts. They come with a fall indicator and corrosion-resistant coated hardware for enhanced durability.

- ▶ Adjustable Shoulder Straps
- ▶ Dorsal D-Ring for Fall Arrest

- ▶ Meets Applicable ANSI Standards
- ▶ Heat Rated for Welding, Cutting and Braising

CONFINED SPACE ENTRY

Equipment for entering confined spaces is crucial for ensuring the safety of workers in dangerous environments. Ranging from large tripods to self-retracting lifeline brackets, this specialized gear is specifically designed to shield workers from the unique hazards found in confined spaces like tanks, silos, and sewers. By using the appropriate equipment, workers can enter and work within confined spaces safely, thus reducing the inherent risks associated with such environments.

Confined Space Entry System Code: FPSKSA17(ALL)

Tripod, Winch, & SRL Includes Adjustable 7' tripod with Dual Pulleys, 65' Winch, two Brackets, 50' 3-Way Cable SRL and Carrying Case

Confined Space Entry System Code: FPSKSA17(W)

Tripod and Winch Includes Adjustable 7' tripod with Dual Pulleys, 65' Winch, Bracket and Carrying Case

Tripod only Includes Adjustable 7' tripod with Dual Pulleys and Carrying Case

65' Winch Code: FPSKPN818DP

65' Winch Bracket Code: FPSKSA17(25)

65' Material or Man Lifting Retrieval Winch

- Features a secondary brake mechanism that helps reduce the impact force experienced in the event of a fall
- Independent reel mode makes installation fast and easy

50' Cable SRL Code: FPSKPCGS50ft(R)

50' Cable SRL Bracket Code: FPSKSA17(26)

50' 3-Way Cable Self-Retracting Lifeline

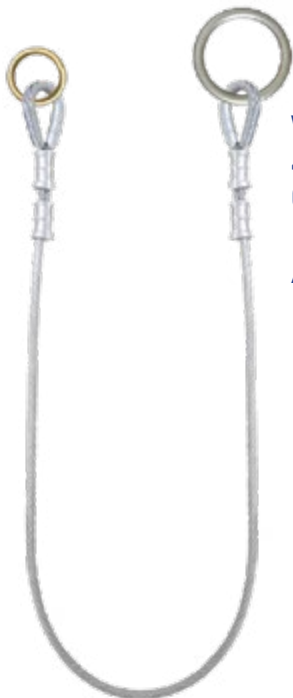

- Easily switch between fall arrester block mode to prevent falls while working at heights or a hoisting winch that can retrieve a worker quickly in case of a fall

ANCHORAGE

Hinged Steel Reusable Anchor
Code: FPSKSA01

Ensuring the safety of workers at height relies heavily on having a secure anchorage for fall protection. Whether it's a stable point on a building or a certified anchor, this anchorage forms the base for connecting lifelines, lanyards, and other fall protection gear. Properly installed and certified anchorage points play a vital role in dispersing the forces of a fall arrest system, effectively reducing the impact on the worker in case of a fall.

Wire Rope Sling
4' Sling - Code: FPSKFAP3408(4FT)

PILOT & EMBARKATION LADDERS

PTR Holland® pilot- and lifeboat embarkation ladders are available in hardwood, polymer and aluminum. All lengths, no limit. Aluminum Lifeboat and Embarkation ladder with RVS cable, specially for oil rigs. Lengths up to 100 meters.

Certificates of:

- Lloyd's Register
- Det Norske Veritas
- Bureau Veritas

PILOT & EMBARKATION LADDERS

Pilot Ladder winch

Rope ladder tarpaulin cover

All steps available tailor made

Hand whipping is also available

Ladder cradle

PILOT & EMBARKATION LADDERS

Jacobs / Monkey ladder

Available in hardwood & aluminum. Ideal for general purpose use.

Pilot ladder

Available in hardwood, all lengths.

Polymer Pilot ladder

Available in polymer.
Available in various sizes.

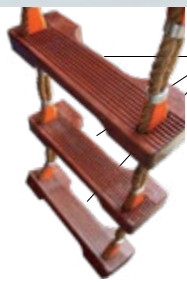

PILOT & EMBARKATION LADDERS

Polymer Lifeboat and Embarkation ladder

Available in polymer.
Available in various sizes.

Lifeboat and Embarkation ladder

Available in hardwood, polymer
and aluminum. All lengths.

grips for cruise
vessel

BLUE BOX SECURING PAD

Part Number:

Item Number

2320932

Blue box accommodation ladder suction/securing pad.

- Enhanced safety during pilot and crew transfers
- The ladder is secured to the hull - uncontrolled movement avoided

PTR's newest pilot ladder securing device for the ship's hull THE SPT-928 is born.

It is Class approved, very easy and safe to install, with a pulling force of 785 kilograms (for each suction cup) regardless the thickness of the paint on the ship's hull and works on the uneven ship's hull, even if the surface is not smooth and has chipped paint.

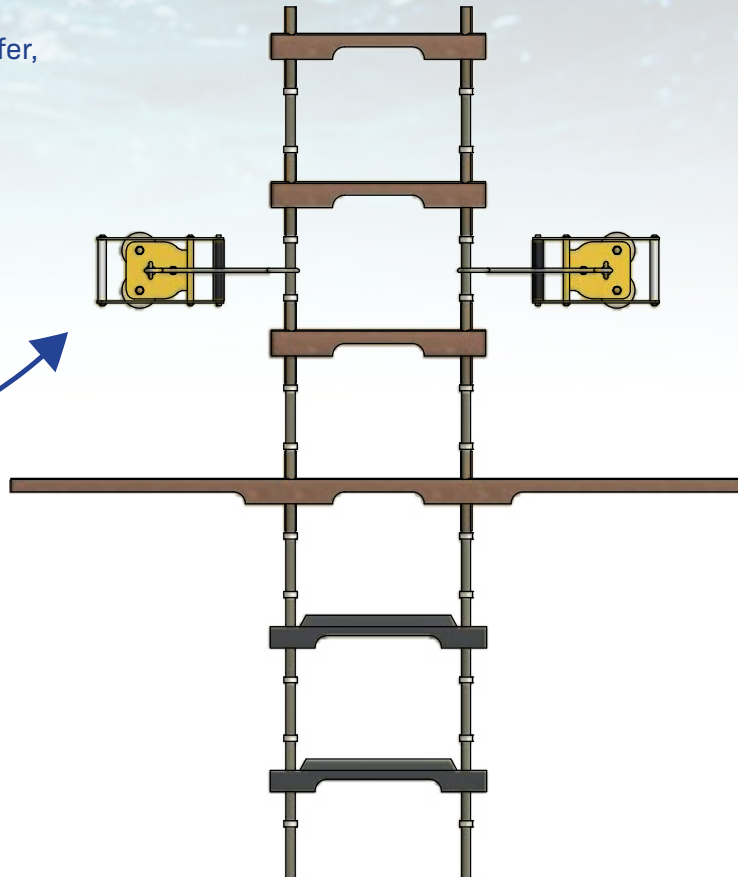

PILOT LADDER MAGNET

Part Number:

Item Number

SPT-928

Pilot ladder magnets for safe pilot transfer, also used for securing oil spill boom

FIREFIGHTING

Self Contained Breathing Apparatus (SCBA)

ITEM CODE: PTR-RHZK-6L

ITEM CODE: PTR-RHZK-6.8L

Product Introduction

The PTR-RHZK-6L & PTR-RHZK-6.8L Self-Contained Positive Pressure Air Breathing Apparatus (SCBA) is an open-circuit, self-contained breathing device designed to provide reliable respiratory protection in hazardous environments. It is an ideal personal protective device for firefighters and emergency responders operating in conditions with heavy smoke, toxic gases, steam, or oxygen deficiency.

Widely used across sectors such as firefighting, chemical processing, maritime operations, petroleum, metallurgy, power generation, warehousing, laboratories, and mining, this SCBA ensures effective performance during rescue and relief missions.

The apparatus consists of the following key components:

- High-pressure air cylinder
- Cylinder valve
- Pressure reducer
- Quick connector
- Air supply valve
- Full-face mask
- Pressure gauge
- Audible alarm
- Ergonomic backplate

Product Performance Parameters

After ten cycles of exposure to ambient temperatures ranging from -41°C to $+65^{\circ}\text{C}$, the product showed no signs of damage such as shrinkage, cracking, swelling, or decomposition.

Working environment:

Temperature Range: -41°C to $+65^{\circ}\text{C}$

Relative Humidity: 10% – 100%

Atmospheric Pressure: 81 kPa – 106 kPa

Emergency Escape Breathing Devices (EEBD) PTR-EEBD-THRS-15

Product Introduction

The THRS Series Emergency Escape Breathing Devices (EEBD) are self-contained compressed air units designed to provide reliable respiratory protection in emergency escape situations.

Engineered to meet the latest international safety standards, these devices deliver a constant flow of breathable air for a minimum of 26 minutes, ensuring safe and effective evacuation.

Operation is simple and intuitive—once the decompression cylinder valve is opened, the user simply dons the hood, with no additional steps required.

Ideal for use in ships, high-rise buildings, commercial facilities, and transportation sectors, the EEBD is specially developed for escape from environments containing toxic gases, smoke, or low oxygen levels. It is a high-performance personal protective device designed to safeguard the respiratory system during critical emergencies.

PRODUCT PERFORMANCE PARAMETERS

- Model Number: PTR-EEBD-THRS-15
- Application: Emergency escape use only
- Duration: ≥ 15 minutes continuous air supply
- Air Cylinder Capacity: 3L
- Cylinder Material: High-strength alloy steel
- Unit Weight: < 9 kg
- Working Pressure: 210 bar

Firefighter Helmet

This EC firefighter helmet imported from Europe has obtained MED certification and CE certification. European standard firefight-er helmet, in line with the latest EU EN443:2008 standard.

1. The product complies with EN443:2008 and SOLAS 74 specifications.
2. The product is made of fireproof and high temperature resistant materials.
3. Equipped with anti-scratch, anti-fog mask and carbon fiber neck protection curtain (removable).
4. The helmet is filled with polyurethane foam material to prevent vibration.
5. The size of the helmet is adjustable. 52cm to 63cm.
6. The helmet is equipped with reflective tape.
7. The chin tightening strap is made of fire-proof cotton and equipped with a chin support, so you will not feel uncomfortable when worn for a long time.
8. This helmet can be used with a full face mask that complies with EN136.
9. Meet SOLAS specifications and have EC MED certificate and CE certificate issued by DNV.

FIREFIGHTING

Fire Hatchet with Insulated Handle ITEM CODE: PTR-FA-SHA

The fire hatchet with an insulated handle is a specialized tool designed to support firefighters during fire suppression and rescue operations. Engineered for both functionality and safety, its standout feature is an insulated handle made from high-performance materials that protect users from electrical shock. The handle also provides anti-slip and wear-resistant properties, ensuring a secure grip in extreme conditions. The hatchet head is crafted from high-strength, specially treated steel, offering exceptional resistance to compression and bending. It is capable of effortlessly breaking through obstacles such as glass, wooden panels, doors, and locks. Additionally, its sharp edge is optimized for quickly cutting through ropes, pipes, and other debris, making it an indispensable tool in emergency scenarios.

Marine Firefighter Axe ITEM CODE: PTR-FA-LHA

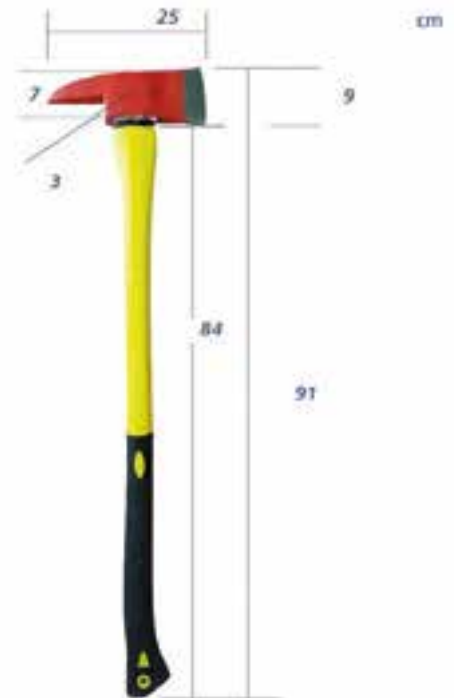

The marine firefighter axe is a critical tool for firefighting operations aboard ships and in marine environments. Engineered to deliver the leverage, strength, and cutting power needed in emergency situations, it enables firefighters to quickly break through doors, walls, and debris, making it an indispensable part of onboard emergency equipment. Designed for harsh and unpredictable maritime conditions, this axe is constructed from high-quality, corrosion-resistant materials that withstand exposure to salt water, humidity, and other corrosive agents commonly found at sea.

Key Features

- Marine-Grade Durability: Built to perform in extreme environments, with resistance to rust and corrosion.
- Enhanced Safety & Grip: Equipped with a non-slip handle to ensure a firm, secure grip even in wet or slippery conditions.
- Reinforced Construction: The axe head is securely fastened to the handle for maximum safety and reliable performance during demanding tasks.
- Versatile Utility: Suitable for a wide range of emergency scenarios, including:

1. Cutting through cables and ropes
2. Breaking glass or opening hatches
3. Forcing entry through doors and panels
4. Ventilation tasks and debris removal

The marine insulation firefighter Axe combines strength, versatility, and safety, making it an essential tool for every vessel's emergency response kit. Whether facing structural obstacles or urgent rescue needs, this axe helps firefighters act quickly and effectively in life-threatening situations.

FIREFIGHTING

Firefighting Protective Suit

Product Introduction:

The firefighting suit is a critical component of personal protective equipment (PPE), designed to safeguard the majority of a firefighter's body during operations in high-risk environments.

This suit consists of a two-piece garment—a jacket and trousers—constructed with three protective layers: an outer shell, a moisture barrier, and a thermal barrier.

The jacket features a stand-up collar, elasticated cuffs, and a front closure system that includes a zipper covered by an overlapping flap with touch-and-close fastenings for added security. The trousers are equipped with wide, elasticated braces featuring adjustable straps and quick-release buckles for ease of use and a secure fit. Crafted from specialized materials, the suit is engineered to shield the wearer from extreme radiant heat, steam, and potential burns or scalds, ensuring maximum protection in hazardous firefighting conditions.

Standards Compliance:

EN 469:2005, SOLAS 74, FSS Code. Certificate: MED RINA

Standards Compliance:

Fire Blanket

Fire blankets are a vital safety component in high-risk environments, particularly in areas such as kitchens where open flames and hot surfaces are common.

Available in three sizes—120 x 180cm, 150 x 200 cm & 200 x 180cm
- Each blanket is supplied in a durable PVC rigid case for easy storage and quick access during emergencies.

- Clear operating instructions are printed directly on the case, ensuring ease of use when time is critical.

Manufactured in compliance with EN 1869, these fire blankets are designed to effectively smother small fires and offer personal protection from heat and flames.

Effective Range 1,5Km
Weight 9Kg
Used for Emergency Situations
like Power Failure, Fires etc.

code 0142092

Manual Siren 110±2db.
Working Frequency 550Hz.
Weight 1,2Kg.
Used for Emergency Situations
like Power Failure, Fires etc.

FIREFIGHTING

Fireman equipment

code 0131020

Fireman Flashlight
(Required 3pcs of Batteries Type D.
Not included).

**IEC Certification Scheme
for Explosive Atmospheres**

code 0149010

Fire Resistant Gloves,
Aluminized Textile for Reflecting
Incoming Heat.
Length: **35cm**

code 0149059

Fireman Gloves

code 0149011

Fire Resistant Boot Cover,
Aluminized Textile for Reflecting
Incoming Heat.

MARINE WATER POLLUTION PREVENTION SOLUTIONS

MARINE WATER POLLUTION PREVENTION SOLUTIONS

Oil Containment Boom

- Top cable: both galvanized and stainless steel.
- Available in both yellow and orange
- Multiple sizes available

Tidal Compensator

- Devices that adjust boom height with changing water levels, ensuring optimal performance during tidal fluctuations.
- Works in conjunction with installed I-beams

Reel Boom

- Shorter floats or logs to be stored on and deployed from a reel
- Ideal for quick-response situations

Reels

Mechanical device used to store and deploy the boom.

Oil Absorbents

Including both booms and pads (if available)

Hydraulic Power Packs

Provide hydraulic flow for operating various equipment. Available with single or multiple circuits for running skimmers, boom reels, and pumps simultaneously.

ILLUMINATION SIGNS

IMO ILLUMINOUS SIGNS

PTR Lifesaving® offers a wide range of phosphorescent markers for shipping. In accordance with the solas convention, the imo resolution and iso 17631. According to the solas convention, the markings identify the position of the rescuer equipment must be manufactured in accordance with International Law Maritime organization (IMO). Markings must refer to symbols on life insurance equipment recommended by the IMO. According to IMO regulations, low light systems (III) are mandatory and also Recommended by ISO. As specified in the Solas Convention, ships carrying passengers must be fitted with Low-voltage electrical or phosphorescent signs and if it carries more than 36 passengers these regulations apply to crew accommodation. Concerning the evaluation, testing and application of low markings location according to the IMO decision, all (III) systems must test it their brightness at least once every five years.
